

## **EMERGENCY OUTLOOK**

*Emergencies can occur at any time and without warning. The emergency can be fire, traffic collision, or a natural disaster. If such events occur when you are in your vehicle, you need to be ready to handle the situation. Emergency professionals recommend that drivers carry an emergency kit in their vehicles. The amount of supplies in the emergency kit should provide for the passengers that are in the vehicle on a daily basis, (i.e., carpooling daily). It is also important to check expiration dates of products in the vehicle kit, twice a year.*

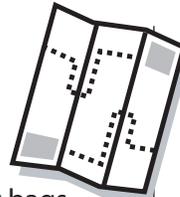

### **Emergency Vehicle Kit**

**The kit should include the following:**

- Water
- Non-perishable food
- Sturdy shoes, spare set of clothes
- Blanket
- Leather work gloves
- Flashlight, extra batteries or light sticks
- Fire extinguisher
- First aid kit
- Flares

- Local maps
- Battery-operated radio, extra batteries
- Re-sealable plastic bags
- Pre-moistened towelettes
- Utility knife
- Jumper cables
- Flat tire fixer
- Hand cleanser
- Reflective roadside safety kit
- Note pad, marker/pen
